7.	About CEIC and Our Databases	7

#### 1. **PRODUCT OVERVIEW**

CDMNext offers a transformed web-based platform from a generic data extraction tool allowing users to create quick analysis in a form of insights with rapid and easy access to CEIC databases. We have introduced substantial improvements from performance to usability to capabilities over the previous web and desktop versions (WebCDM + CDM).

With the goal to improve user experiences with simple steps and clicks to complete a workflow, our proprietary platform conveys a new concept in data discovery, advanced visualization, data transformation, extraction, integration, management, collaboration and engagement.

#### 2. STARTING CDMNEXT

#### 2.1 Login

To access CDMNext, go to <u>https://insights.ceicdata.com</u> and log in with your registered email.

#### Forgot password?

Enter your registered email address to reset your password.

#### **Support Portal**

Login to CEIC Support Portal directly to access our

comprehensive Knowledge Base covering solutions and FAQs on data related questions, platform issues and CDMNext functionalities.

#### **Guest Mode**

For IP authenticated users who prefer to navigate CDMNext without registration, a guest access is available for the same subscribed data with limited platform functionalities.

#### 2.2 Prerequisites

CDMNext currently supports the following browsers and versions:

Browsers	Resolutions	Devices
Windows 7 and above <ol> <li>Microsoft EDGE 88+</li> <li>Google Chrome 31+</li> <li>Firefox 30+</li> <li>360</li> <li>Mac OS X Mavericks         <ol> <li>Chrome (latest)</li> <li>Firefox (latest)</li> <li>Safari (9+)</li> </ol> </li> </ol>	<ul> <li>Desktop (with resolution 1920 x 1080 and up)</li> <li>Laptop (with resolution 1366 x 768 and up)</li> <li>Tablet (1024x768 - landscape orientation)</li> <li>Tablet (768x1024 - portrait orientation)</li> </ul>	<ul> <li>Desktops, Laptops</li> <li>iPad 3+</li> </ul>
<ul> <li>iOS 8.0 and above <ol> <li>Chrome (latest)</li> <li>Firefox (latest)</li> <li>Safari (9+)</li> </ol> </li> <li>Android 5.0 and above <ol> <li>Chrome (latest)</li> <li>Firefox (latest)</li> </ol> </li> </ul>	The minimum screen size - a tablet in landscape: 1024x768 resolution a table in portrait: 768x1024 resolution	

#### 2.3 Landing Page

Upon logging on CDMNext, the landing page starts with intuitive search to help you discover CEIC data series and other insights / reports.

The data and insight discovery tool on the left panel allows users to easily navigate all the available content in our CEIC databases, Analysis, Comparables, Release Calendar and Watchlist by searching and/or browsing.

The right panel is reserved for managing / editing users' own insights. Users can retrieve their saved / shared insights in 'My Insights' folder.

CEDG	
All Regions ~ Q Search	6,133,701 series ~ >
Indicator v Frequency v Source v Status v More v ⊳ v	
Data Analysis Comparables Releases 单 Watchlist …	
DatabasesSeriesDatasets+World Trend Plus (350,890)+Global Database (3,816,251)+Global Key Series Database (38,736)+Markit Purchasing Managers' Index (5,305)+Daily Database (34,014)+Brazil Premium Database (346,443)+Russia Premium Database (226,579)+India Premium Database (478,659)+Indonesia Premium Database (385,451)+China Premium Database (344,111)	

The tabs below the search bar provides the different viewing modes to navigate the search results.

- 1. Data access to the full CEIC Databases, individual series and datasets
- 2. **Analysis** access to all CEIC Insights, EMIS Insights, and other third-party reports (added intelligence on data and current events)
- 3. Comparables standardized list of key series grouped by region
- 4. Releases release schedule of series in a timeline
- 5. Watchlist latest updates and notification management on selected series

To customize your own landing page, click on ... to select the tabs to display in your preferred order.

Select tabs to display		×

## 3. CREATING INSIGHTS

To create an insight, simply add or drag & drop the selected series to the right panel. This action automatically adds the series to My Series.

			< View as		
				Unselect	A My Series
				× New Series ×	
				≜ ⊑ ⊵ ≈ : +×	Line
↑ 162%	8,490 ZAR mn	Annual 03/2015 - 03/2019	Updated 16/10/2019	Add series ("A" or click) Add and replace series ("R	" or CTRL + click)
↑ 90.31%	1 <b>5,809</b> ZAR mn	Annual 03/2015 - 03/2019	Updated 16/10/2019	South African Reserve Bank	$\sim$
↓ 53.85%	<b>2,554</b> ZAR mn	Annual 03/2015 - 03/2019	Updated 16/10/2019	South African Reserve Hank	Area
↑ 158%	6,259 ZAR mn	Annual 03/2015 - 03/2019	Updated 16/10/2019	South African Reserve Hank	l de l
↑ 65.91%	438 ZAR mn	Annual 03/2015 - 03/2019	Updated 16/10/2019	South African Reserve Hank	Column
↑ 275%	<b>6,675</b> ZAR mn	Annual 03/2015 - 03/2019	Updated 16/10/2019	South African Reserve Hank	1 <b>1</b> 1
↑0%	-1 ZAR mn	Annual 03/2015 - 03/2018	Updated 16/10/2019	South African Reserve Hank	Bar
↑ 46.53%	211 ZAR mn	Annual 03/2015 - 03/2018	Updated 16/10/2019	South African Reserve Hank	
↑0%	100 ZAR mn	Annual 03/2019 - 03/2019	Updated 16/10/2019	South African Reserve Hank	Table

Once series are added to the right panel, an insight is automatically created in your account. You may name your insight to save it properly to My Insights.

< My insights > Na	me your insight 🖌 🕻	2

You may add additional sheets to your insight for visual creation, including line, area, column, bar, pie, table, map heatmap, or to insert a text box for commentary, image or URL.

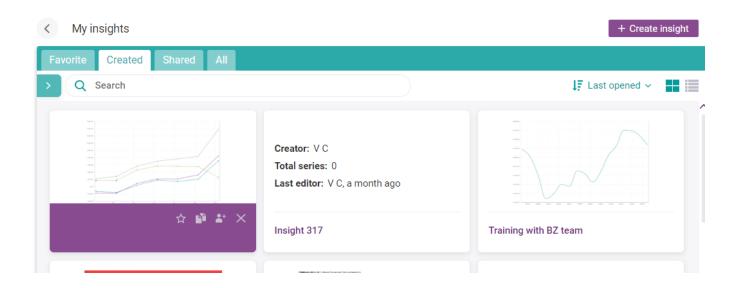

Next to the insight title on the right, you may click on the cogwheel to set special setting or share the insight with other colleagues within the organization.

< My insights > Name your in	nsight 🖌 🌣		Share (1 insight)		×

Next to the insight title on the left, you may click on My Insights on the left of the breadcrumbs to explore 'My Insights' that contains all of your insight collections (created/saved by yourself and shared by others).

Under the Analysis tab, you may copy and customize one of the insights in your account. You may choose to preview or customize the insight when you mouse hoover the selection.

After clicking on 'customize,' a copy will be created to right panel under My Insights. You may rename this insight, or make further edits in the saved copy.

#### 3.1 Data Discovery

On the landing page, the search is presented in the center of the screen. When the right panel is expanded for insight editing, the search will be minimized to the left panel.

You may adjust the size of the search screen to best fit your current activity.

**Advanced** allows users to include/exclude any keyword combination and series IDs. The search for series ID can filter out non-series ID inputs such as keywords / operators.

Help offers search tips.

The faceted search algorithm helps to refine and filter results by selecting one or more criteria in parent-child relationship. Within a rich database, this hierarchy structure enhances the flexibility to retrieve data in a systematic approach by excluding unmatched results.

For example, if you select 'active' under status, other filters will only include 'active' series with narrowed down results.

Under the series tab, the sort by field with dropdown options allows users to arrange the results in preferred order.

Popularity – by series with highest usage -

CERC

- Recently updated by latest series with modified time point/status -
- New series by latest series added to the database \_
- % change, last value, status, region, frequency, first date, last date, unit, source \_

#### 3.2 Data Selection

When you have identified the series to save in your insight, simply drag and drop the selected series from search to the series list or visual creation on the right panel. Alternatively, you may click on + to add series to the series list.

This action will be auto saved in your insight by default setting.

The arrows in between data discovery and selection allow you to adjust the space for each panel display. This allows you to collapse or expand for a shared / full screen display.

The same formula bar is presented to allow searching and browsing.

Alternatively, you can insert a function from the list of categories on the left.

To see the respective function description and illustrated example, click on 'help on this function.'

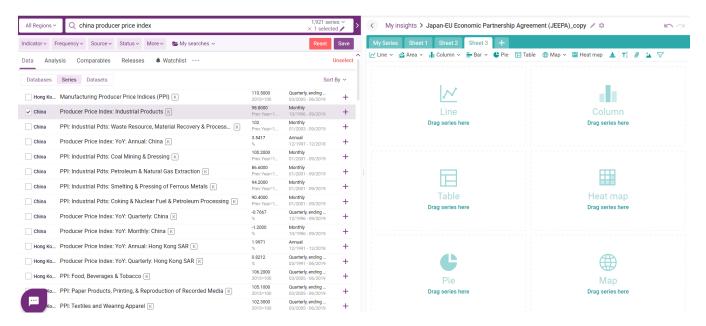

#### 3.4 Visualization

Next to the Data tab, the **Sheet** tab is presented for visual creation. The available visual tools include chart (line, area, column, bar, pie), table, map, heat map, histogram, commentary, attachment insert and image upload.

You may create up to 10 views (tabs) within an individual insight.

To insert a visual with the selected series, you can simply drag and drop the selected series from search on the left panel to the right panel in the content area.

With more than one visual presented in the Sheet tab, you can drag and position each visual presented in the content area.

To modify the series settings of your selected visual, click on the **edit series** to open up the series settings on the left hand panel.

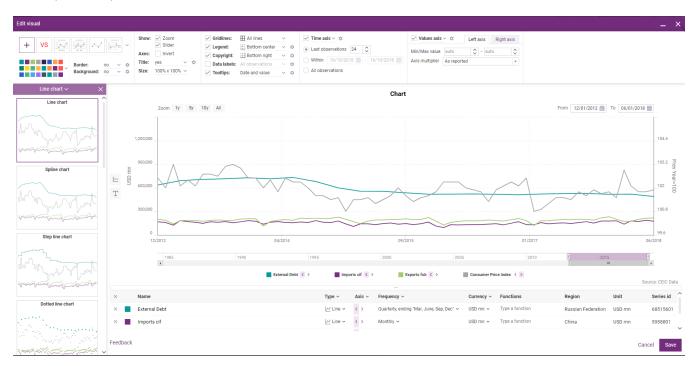

You can select the series to directly reflect in your visuals.

CDMNext offers an in-built auto axis detection to properly place series with 2 different units onto the left and right axis.

Reserve & Ourrency & Change × 2. 	+ Add more from My Series		>	

Besides **edit series**, you may also access **edit chart** to open a module to modify your visuals more precisely.

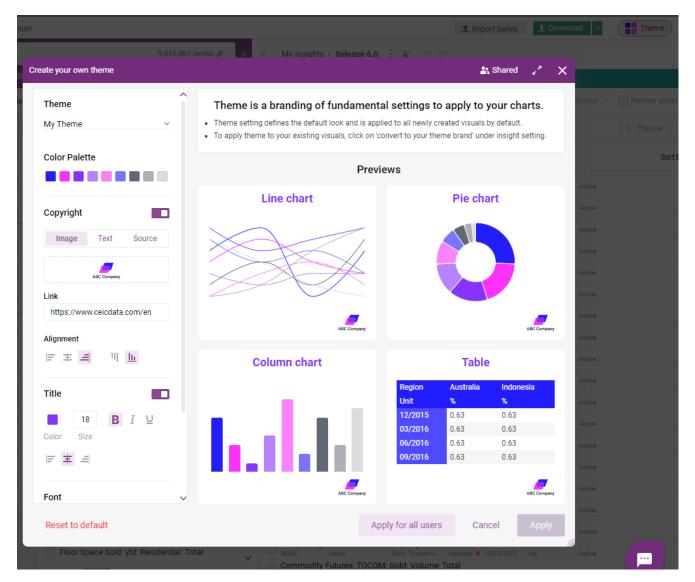

The visual configurations such as date range, attributes, values, legend, colors, tooltips, and data labels are available on the toolbar. The left panel offers a gallery of recommended visuals for your selected series.

#### How to create your own themes!

On the landing page, next to the download button – the theme is available to create and apply on insights.

The theme is a branding of fundamental settings to apply to CDMNext charts. It defines the default look of all the new charts created on CDMNext insights. On charts that have been created before, users can also apply the new theme manually.

In terms of customization, users can choose from a wide range of color palette, copyright (image, text, source), link, alignment, title, font type/color, background, and border color.

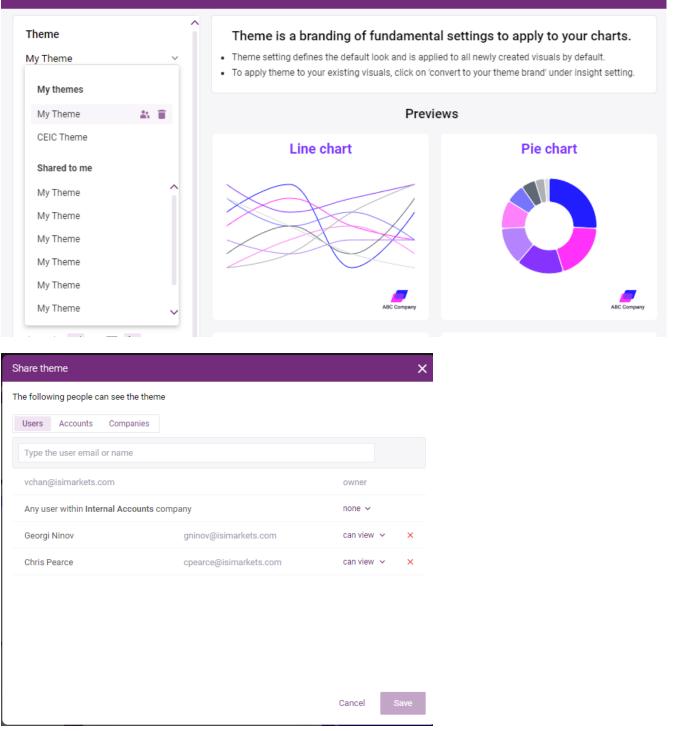

Users can create multiple themes and save them under the theme folder, which allows to be shared with their colleagues across the organization.

#### 3.5 Series Suggestion Manager

Under both the MY SERIES and VIEW tabs, CDMNext offers a **related series** module for **suggested indicators** (available for all series), **forecast data** with linkage to actual series, **suggested replacements** for inactive series, **breakdowns**, and **dependencies** with linkage of base data and in-house calculated series.

The **indicators** are suggested based on the country currently displayed/selected in your data/visual. To select a country to see related indicator, click on the country dropdown.

By default, when no series is selected, related indicators suggest the following countries – China, United States, Japan, India, and United Kingdom.

The suggested indicators include the macro indicators from Global Economic Monitor, financial indicators from Daily Database, and global indicators from a mix of databases

- **Macro indicators** (mostly from GEM, or GLODB with series in similar frequencies, units, meanings) country specific
- Financial indicators (Daily DB, GEM) country specific
- Global financial indicators (Daily DB, GEM) common for all countries

Indicators	Forecast	Replaceme	ents	Breakdowns	Dependencies	
China	Indonesia	United States	India	Hong Kong SA	R Select a Region	v
GDP Business Confidence CPI Consumer Confidence Current Account Balance Domestic Credit Electricity Generation Exports External Debt	e	FDI FX Reserves GDP Deflator GDP Per Capita House Prices YoY Household Debt IPI Imports Labour Productivity YoY	ſ	Money Suppl NPL Ratio PPI Population RRR Real GDP Yo' Retail Sales Y Unemployme Wages	Y YoY	
Equity Market Index FX Rate		Interbank Rate Market Cap		Policy Rate REER		
Brent Oil Price Dow Jones Index		Gold Price LIBOR		S&P 500 World GDP		

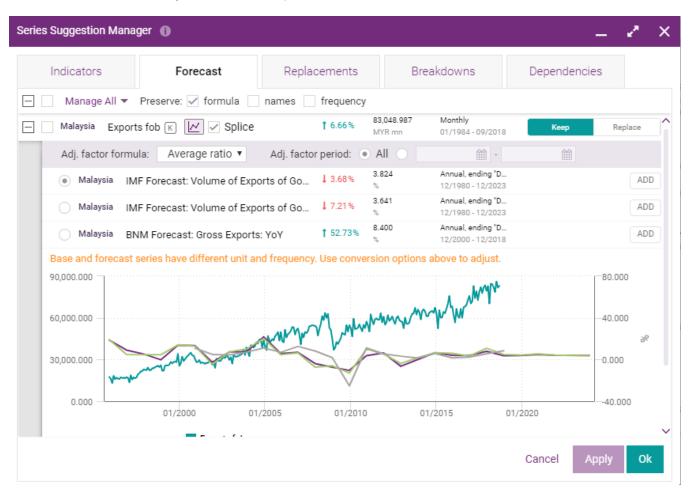

The **forecast** tab presents the series relationship between actual vs. forecast series, a manual mapping defined by CEIC database team.

This manager provides the guided calculations to facilitate series jointing upon user's choice, in case the base and forecast series have different unit and/or frequency.

To manage your series, you may keep the individual series as they are, or replace them with a new one.

The forecast data is subject to suitability for Global Database & World Trend Plus Database.

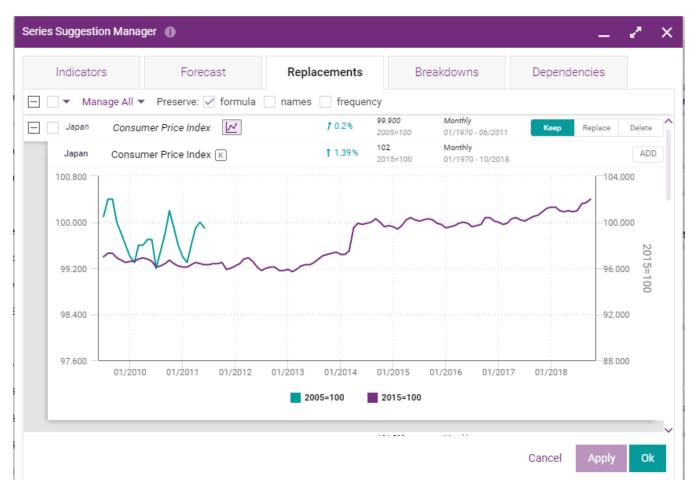

The **Replacements** tab presents the suggestion of new series to replace the inactive series.

To manage your series, you may keep the individual series as they are, or replace them with a new one.

The replacements are subject to availability for inactive series presented in all CEIC databases.

The **Breakdowns** tab present series relationship by quickly locating the related breakdown series under the assigned header in a more structured series naming.

The exposed series can be added and/or group to your existing / new insight.

The header and breakdown relationships are subject to availability for series presented in Singapore and South Africa under Global Database.

Series Suggestion Mana	ger 🕦				_	. 🖉 🗙

The **Dependencies** tab exposes the reference of base series and CEIC in-house calculated series.

The base and calculated series are presented on a pre-built chart for easy comparison..

The scope of base vs. derived series is focused in specific source from CEIC Generate, available in GEM and AEM dataset.

#### 3.8 Share

After you have saved your insight, you may share it with other users within the same organization. Click on the cogwheel to share the insight with other colleagues within the same organization.

Share insight	>
The following people can access the insight:	
Virginia Chan vchan@ceicdata.com	owner
Any user of CDMNext	none ~
Any user within Internal Accounts company	none ~
Invite specific:	can view ∽
Select people you want to invite	
	can view
	can edit

You may invite specific users to access your insight with option to view, edit or manage.

**Can view** – shared user(s) will be granted with permission to view the insight only

**Can edit** – shared user(s) will be granted with permission to modify the insight (such as adding series, creating a visual, uploading an attachment)

**Can manage** – shared user(s) will be granted with the same permission as the creator (such as sharing with others, deleting an insight)

#### 4. **IMPORT SERIES**

#### 4.1 **User Data**

To import your own custom data to CDMNext, users can click on the 'Import Series' option on the upper right on the landing page.

Follow the instructions in the pop-up message to download the CEIC defined template in Excel.

After uploading your file to CDMNext, you will receive a notification that your file has been successfully uploaded.

	🚹 Import Series 👱 Download 🗸 🌲 🔍
< My insights > Name your insight 🥒 🌣	
My Series View 1 +	Edit Views
+ Related Series 🖉 Rename 🐵 🏛 🗁 🌲 🐇 📫 🖪	\$
List Table 🌣	Sort By ~
Import your data	_ ×
To import your own custom data to CEIC, please follow the instructions below. 1. Download the CEIC defined template and open it in Excel. 2. Select the attributes and add the data. 3. Import the data file below. To retrieve or modify your imported data, go to Imported under the DATA tab.	Note Supported files 1. CEIC supports Excel files only. 2. Each file can contain up to 3000 series. 3. Each series can contain up to 3650 timepoints.
<b>E</b> Drag a file here or click to select a file from your computer	Data Privacy         1. The imported series are accessible for all users in your account.         2. Our client database is encrypted with access restriction except for maintenance purposes.         3. Your imported data is restricted and accessible only by users within your account.         Data Management         1. The imported series can be edited by all users in your account.         • To edit any series, apply the changes in your Excel file and re-upload it to CDMNext.         2. The imported series can only be deleted by the creator.         • In case the creator has resigned from your company, please contact our helpdesk team for deletion.

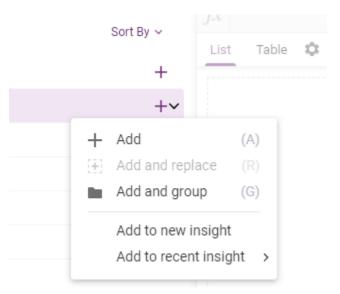

To retrieve or edit your data series, go to the 'Imported' sub-tab under Data tab.

In the BETA launch, users can only edit the series in Excel file and upload it again to CDMNext.

	China	Series 2					+
	Indonesia	Series 1					+
	Malaysia	Series 2					+

Note: if you have not uploaded any data to CDMNext, this 'Imported' tab will be hidden.

You may add your imported series to a new insight to create visuals and apply math functions on CDMNext.

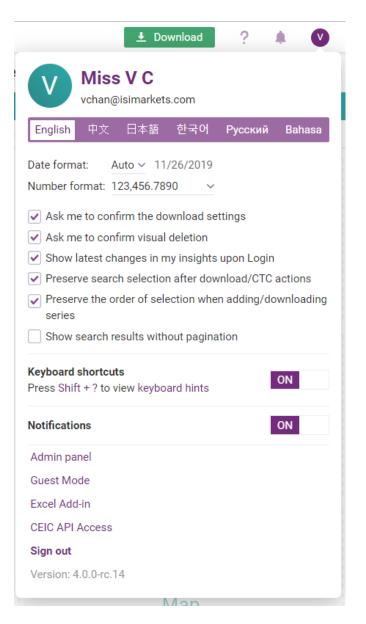

### 5. USER SETTING

#### 5.1 General Setting

On the upper right-hand corner, users can click on the avatar to modify personal information, interface language (available in English, Simplified Chinese, Japanese, Korean, Russian, and Indonesian Bahasa), date / number format and other default settings.

The keyboard shortcuts and notifications are enabled by default.

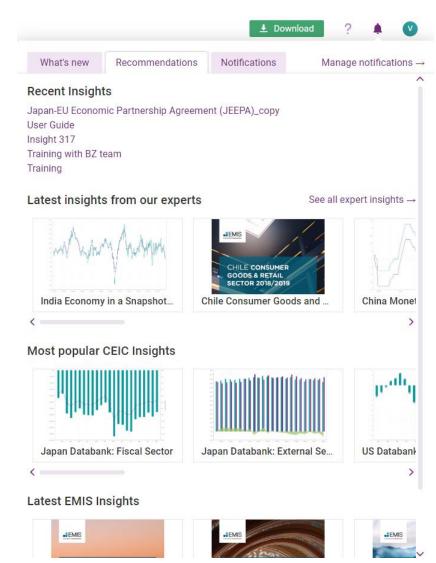

#### 6. NOTIFICATIONS

For keep abreast on CEIC announcements, users can explore the notification slider – located on the upper right corner of the landing page.

The first tab with 'what's new' features the latest insights from our in-house experts, and our monthly insider with highlights.

The second tab with 'recommendations' promotes the recent insights that you have opened, and other latest insights from our team.

The third tab with 'notifications' summarizes the latest series updates / activities from your Watchlist.
